Policy 513.4 (previously 603.4)

Selection of Learning Resources

Learning Resources 1st to 13th years of the educational program

The Board of Education (Richmond) acknowledges that a wide range of learning resources are required in order that the educational needs of students in the district may be met. The Board expects that good professional judgment will be exercised in the selecting of these learning resources and that there will be consultation with others, including parents and other professional colleagues, where deemed appropriate by staff.

Supplementary Teaching Materials

In keeping with legal requirements, the Board will consider for approval the use of supplementary materials such as workbooks, textbooks, and teaching aids, to enhance the district's instructional programme.
